

Community Relations – Series 4000 School Performance Report - 4500

By law, each school must publish annually a School Performance Report and deliver the report to each parent with children enrolled in the school and make the report available to the community served by the school. This report is intended to provide the local community and electorate with access to information on the educational programs in the district. The report must be in a form that can be easily understood by parents, guardians, and other members of the community who are not professional educators to enable them to make informed educational decisions.

As data becomes available, the School Performance Report should enable parents, educators, and school board members to determine whether students in the district are attaining mastery of the student learning goals under RCW 28A.150.210 and other important facts about the school's performance in assisting students to learn. The annual report must make comparisons to a school's performance in preceding years and shall project goals in performance categories.

The School Performance Report must include, but not be limited to:

1. a brief statement of the mission of the school and the school district;
2. enrollment statistics, including student demographics;
3. expenditures per pupil for the school year;
4. a summary of student scores on all mandated tests;
5. a concise annual budget report;
6. student attendance, graduation, and dropout rates;
7. information regarding the use and condition of the school building or buildings;
8. a brief description of the restructuring plan for the school; and
9. an invitation to all parents and citizens to participate in school activities.
