

## **Human Resources – Series 5000 Employee Participation in Political Activities – 5515**

The Board recognizes the right of its employees, as citizens, to engage in political activities. However, an employee may not campaign for a political candidate or for a political issue during school hours on school property. The Superintendent or designee is directed to establish procedures that implement this policy.

An employee may seek an elective office provided that the employee does not campaign on school property during working hours.
